

POW – Problem of the week

Week 16

Problem of the week for class 1-6

Three and six

In this picture we would like you to write the numbers 6 and 3.

Watch out!

The sum of each horizontal, vertical and each long diagonal line should be 21.

Place the numbers 3 and 6 to match.

Problem of the week for class 7-10

Golf clubs

Erik sold two golf clubs for 120 euro each. On one, he earned 20%, but on the other he lost 20%.

How much won or lost Eric in total when he sold the golf clubs?
