

POW – Problem of the week

Week 4

Problem of the week for class 1-5

Build a bigger dice

If you put together 27 dices into a 3x3 cube, and you want to make it with the smallest amount of pip's (dots) visible on all sides. How many pips (dots) will it be in total ?

Problem of the week for class 6-10

At the well

You are standing at the well with only two buckets; one that can contain 3 liters and one that can contain 7 liters.

How do you get exactly 5 liters of water ?
